

Complete Refurbishment Barnsley College

Barnsley

CPS Involvement

A full mechanical services package covering the complete refurbishment works at Barnsley College, Old Mill Lane Site, 'B' block.

This was completed under a JCT2 contract on behalf of T&C Williams Builders Ltd. The full mechanical package consisted of the supply and installation of a full heating system, air handling ventilation to all areas, including main extract ventilation systems to all new kitchen areas. We were also responsible for the supply and installation of all domestic services and toilets (including all sanitary ware).

Project resolution

The project was managed throughout by CPS, with our qualified team maintaining the usual high standards of quality, efficiency, and safety. Traditionally in the UK construction industry, most of these activities are contracted separately. Here at CPS, we offer our clients a fully integrated service with all the benefits of a seamless packaged solution.

Timescale

This project was carried out to a programme put in place by the College, and the main contractor. The schedule was adhered to on all aspects of the mechanical installation with weekly internal management meetings, keeping everyone up to speed with our efficient project teamwork. Working closely with our client's team we delivered projects on time and budget.

Project results

As a result of our vast experience within the mechanical industry, the project was fully commissioned, and began on 12th September 2008. The huge success of the completed project was a direct result of our expertise in the following abilities which we pride ourselves on:

- In-depth project management and site supervision expertise
- Design teams equipped with the latest CAD technology
- Highly skilled installation engineers trained in-house
- Prefabrication manufacturing capacity
- Strong supply chain partnerships

Projects costs

£1m.
