

# Re-Fit Hospitality Suite Barnsley Football Club Barnsley

## CPS Involvement

Complete Pipework Services were employed to take on the full project as the main contractor. Design responsibilities and CDM regulations are all within our portfolio, as was project managing all contractors - obtaining maximum efficiency throughout the contract:

## Project resolution

The project consisted of removing various internal walls to create more space, efficient environment (with state-of-the-art air conditioning and ventilation) and with a well designed modern bar/server. With works completed, the installation of a new suspended ceiling, electrical equipment and lighting, the suite now feels spacious and modern.

## Timescale

The project was carried out during the close of the football season, with the lounge back to full working use before the new season started - a very tight schedule. Therefore a full programme of works was provide by Complete Pipework Services, including monitoring on a weekly basis to ensure all other trades adhered to the short timescale.

## Project results

The new Legends Suite has proved to be very beneficial to the Football Club, not only financially, but as a privileged environment for all the executive members, staff, players and senior management to congregate before during and after the match. The club can now offer a wide range of functions from weddings to parties, from conferences and gentlemen's evenings, all thanks to Complete Pipework Services.

## Projects costs

The budget provided was initially £75k. CPS were able to complete all the necessary build, mechanical and electrical works (along with the new bar which currently sits as an impressive focal point within the newly named 'Legends Suite') within budget, leaving Barnsley FC with funds to spend on further ventures.
